

basics.

Name:

University: (include the year of your thesis)

Thesis Project Title:

Accolades: 1. (name of the award), (winning position)
2. (similarly carry on to list out all of the achievement for academic thesis)

interview.

Q.1) Share a bit about yourself & what are you doing now? (job / higher studies)

Q.2) What was the title of your thesis project and what was it about?

Q.3) How did you come up with such an idea?

Q.4) How did you turn that idea into an architectural project and developed your concepts?

Q.5) What difficulties did you face while working on your thesis project?

Q.6) Now that you have become an architect and experienced the practical field of architecture, would you be doing anything differently on your thesis now if you have given a second chance?

Q.7) Looking back, what was the most rewarding moment during your thesis journey, and how did it impact your approach to architecture?

Q.8) Are there any other opportunities to develop a potential thesis topic related to the project you have done?

guidelines.

- This online publication is more interested in the generation of your concept, thoughts & idea development rather than the final project. The aim of this Interview is to inspire the current students to find a topic for their thesis or how they can develop their design ideas from your words.
- Please try to keep all of your answers short. Keep the total word count of all your answers to 1000-1200 words.
- Submit by emailing an accessible google drive folder link at contact@plannersroute.com. In this folder upload your filled out word file and Images. There will be 3 pictures published alongside this article. All pictures should be well-lit and free from graininess or darkness. 1920x1080 resolution are encouraged.
 - 1) Cover Image: A picture of you in front of your thesis project presentation / model / award that you have received.
 - 2) Sketch: A picture of a conceptual sketch that you did during your thesis and related to one of the answers from the interview. Mention under which answer you would like to post this picture.
 - 3) An incomplete render/ model making picture showing the progress of your project. If you can't find any, then add another sketch image like before. Mention under which answer you would like to post this picture.

optional.

- On a separate Google Drive folder, please upload the images of your drawings, diagram renderings, physical model pictures, project brief in another doc file and any other necessary presentation elements in PNG format. High resolution of sharp picture is encouraged for this submission. This is for a book publication that I plan to publish by 2025, if all goes well. The book will be a compilation of award-winning thesis projects. Additionally, kindly include a fine picture of yourself in black and white for the book article as well.
